

This is my first LaTeX document.

Suppose we are given a rectangle with side length $(x + 1)$ and $(x + 3)$. Then the equation $A = x^2 + 4x + 3$ represents the area of the rectangle.

Note: If we use '\$' then math equations are shown on same line whereas use of '\$\$' results in math equation in new line.

This is my first LaTeX document. Suppose we are given a rectangle with side length $(x + 1)$ and $(x + 3)$. Then the equation $A = x^2 + 4x + 3$ represents the area of the rectangle.
